GREEN

Dear Sir or Madame,

The fair of sustainable technologies and green lifestyle GREEN began in 2014 to successfully co-create a new model of sustainable economy and society as the first such fair of its kind in Slovenia and far beyond its borders. The satisfaction of exhibitors, the enthusiasm of visitors and its public acceptance promise the fair's successful future growth, recognition and positive results for all those participating.

GREEN 2015 will present products and services that are friendly to nature, man and society throughout their entire life cycle. At the fair we will meet designers, manufacturers, suppliers and clients of green technologies, products and services on inter-organizational level and in the sphere of final consumption. Innovative individuals and companies will extend a hand to scientific institutions, governmental and non-governmental institutions and end users. Linking us in a green alliance will, along with business presentations, be high level professional consultations and popular educational events for the general public.

Be the standard-bearer of live green areas that demonstrate fast economic growth and ever greater social significance at the fair GREEN 2015. Offer your products, services and ideas for green production and consumption, for healthy living and sustainable development. Let us prove together that for manufacturers, consumers and the social and natural environment only green products and sustainable management can be successful in the long-term.

You are cordially invited to our successful collaboration for a greener future!

Pomurski sejem d.d.
Janez Erjavec,
President of the Management Board

Running at the same time as the GREEN Fair will be the SPRING FAIR for CONSTRUCTION, ENERGETICS, MUNICIPAL SERVICES AND TRADE. In 2014, the combined trade fairs attracted 220 exhibitors from 18 countries who, on an exhibition area of 10,000 m² drew 10,000 visitors.
