VISOCON

SIMPLY SEAMLESS COLLABORATION

easy access through multi devices

Use and switch between devices as you like. eyeson is available via Web browser, smartphone-app (Android, iOS) and tablet-app (Android, iOS) and optimized to meet the device-specific demands.

no installation

Benefit from maximum flexibility in video communication without additional download. Start your communication flexible and quick – any place, across devices, by only one click.

seamless integration

Use our pre-designed UI for a quick and seamless integration into your system. Get full access to your contact-network and – optionally – use your individual user authentification.

professional cloud-solution

With the eyeson cloud-solution, you benefit from reduced costs, shorter innovation cycles, continuous feature-releases, higher security-levels and faster implementation.

customized branding

Customize the software with a few clicks and brand it with your logo, your CI-colors, … to meet your individual demands

top-level security

We strictly comply with the highest international security standards, use state-of-the-art encryption procedures and access control systems for data transmission. We guarantee, that your data is stored on high-security servers located within the european region.
