Title: A Dutch based medical device multinational is looking for a small diameter sensor to measure liquid pressure for medical use

Summary:

A Netherlands based worldwide operating medical device producer is looking for a small diameter sensor to measure liquid pressure.

The sensor should be ultra-small and applicable in a medical environment.

The company is looking for a collaboration with industrial partners or research and development groups and envisions a license agreement or a technical cooperation agreement.

Type and Role of Partner Sought:

SME's, research groups and other innovators with a focus on the research & development of micro-sensors to measure liquid pressure.

It is expected that the partner supplies material, technology or ideas which eventually will lead to the envisioned device: a small diameter sensor to measure liquid pressure for medical use.
